

Red-Green Exercise

Task

To end up with the highest possible positive score for your team

Procedure

After five minutes a facilitator will visit your team and ask you to decide whether to play GREEN or RED in the first round. They will subsequently ask this for each round providing a maximum of 3 minutes to reach a decision. After each round the facilitator will tell you the colour that other groups have played and will inform you how many points you have scored in the round.

Play will be scored as follows:

-1	-1	-1
+2	+2	-3
+3	-2	-2
+1	+1	+1

There will be ten rounds.

After the **second** and **fifth** round, the facilitator will ask the groups whether they wish to have a conference. This conference will take place at the request of at least **two** teams. You should send one representative to the conference. If a team does not wish to confer then they will not attend the conference. The teams will have 3 minutes to prepare for the conference and 3 minutes to reach an agreement. If an agreement cannot be reached after three minutes, the facilitator will stop the conference and ask groups to place their play.

The **sixth** and **ninth** rounds score double for **that** particular round.
